Stage capacity, notice and state preservation

1 Applicable agreement and common conditions

Import profile · call notice · duration · original deadlines

Commissioned assets · permitted local supply · compatibility · hourly CFE

Paths can combine: host staging may precede durable saving.

2a GPU retention

Pause some computation

Power GPU and support

Keep necessary state

2b Host staging

Complete GPU-to-host copy

Keep host memory powered

Check capacity and support

2c Durable saving

Finish persistent write

Confirm before shutdown

Include restoration time

3 Common temporal assessment

Protection path → remaining work and any recomputation → original deadline

Network: net imports; hourly CFE: site consumption and clean attribution

4 Boundaries and applicability

Capacity–notice–admission; retain both baseline agreement and disagreement

Deliverable / undeliverable / unresolved; hold out paths after policy selection
